#### WHAT IT IS:

Arisun's Aftershock XD is designed for extra traction and durability on hard and mixed terrain. Closely grouped tread lets it ride smoothly on hard surfaces while it adds protection from punctures. Tough eight-ply-rated construction includes a highly puncture resistant Aramid composite layer.

At \$175 for the 30x10R14 size, the Aftershock XD's price is about \$10 less per tire than other eight-ply tires. It's also available in 28x10R-14, 28x10R-15 and 30x10R-15.

Raceline's Black Mamba beadlocks are cast-aluminum single-beadlock wheels with a forged-billet outer ring and a reinforced inner lip. Sixteen bolts retain the ring on 12-inch wheels, and 20 bolts are used on 14- and 15-inch sizes. Black Mambas are \$180 in the 14-inch size, which is \$10 to \$15 more than some other single-beadlock wheels.

 Arisun's Aftershock XD tires on Raceline Black Mamba beadlock wheels are a rugged combination that will give your UTV a more aggressive and personal style to UTVs and ATVs.

than the stock 29s to help in ruts, rocks and deep sand. The Aftershock XD is made for hard to intermediate terrain, and our test area has everything it was designed for and more: hardpacked clay and sandstone trails, rocky areas, and sand.

The Aftershock XD's smooth ride was instantly noticeable on hard terrain, as was its impressive traction on slippery hardpack with loose material on top. No matter where we went, this tire's cornering grip and crisp cornering feel made the RZR's handling feel precise. The tight tread grouping also worked well on bare rock, and the tire endured trails loaded with loose, jagged rocks with no punctures or tread damage. When running low pressures or traveling where flats are likely, it was reassuring to know the Raceline beadlock wheels had a secure grip on the beads. The Black Mamba's beadlock ring bolts are semi-countersunk to keep the bolt heads from being beaten up by rocks. In soft soil and sand, the tires worked well, but didn't offer the traction of tires designed for softer conditions. Arisun has a full line of tires to handle soft/intermediate terrain, as well as dedicated mud tires.

([http://utvactionmag.com/wp-content/uploads/2016/07/ARISUN2\\_DSC\\_2166.jpg](http://utvactionmag.com/wp-content/uploads/2016/07/ARISUN2_DSC_2166.jpg))

The Aftershock XD's closely grouped tread puts plenty of rubber on hard surfaces, lets it ride smoothly and adds protection from punctures. Raceline's Black Mamba wheels are engineered for abusive terrain, with a forged beadlock ring held by semi-countersunk bolts. The inner lip is reinforced, and the stem is located between the wheel spokes for protection.

#### THE VERDICT:

Arisun's Aftershock XD tires provide impressive grip and toughness in hard terrain where traction is scarce and tire hazards are plentiful. Raceline's Black Mamba beadlock wheels add functional style to machines and the security that tires will stay beaded when running low pressure or if a flat occurs.
